

NAME

pdfbook2 – transform pdf files into booklets for double-sided printing

SYNOPSIS

pdfbook2 [*options*] *INPUT* [*INPUT*, ...]

DESCRIPTION

Create print-ready PDF files from some *INPUT* PDF files for booklet printing. The resulting files need to be printed in landscape/long edge double sided printing. The default paper format depends on the locale and is chosen by pdftjam. It can be set with the `--paper` option.

Before the pdf is composed the *INPUT* file is cropped to the relevant area in order to discard unnecessary white spaces. In this process, all pages are cropped to the same dimensions. Extra margins can be defined at the edges of the booklet and in the middle where the binding occurs.

The *OUTPUT* is written to *INPUT*-book.pdf. Existing files will be overwritten. All input files are processed separately.

EXAMPLE

To simply **create a booklet** from input.pdf you can use

```
pdfbook2 input.pdf
```

to create input-book.pdf. To select a special **type of paper** you can do

```
pdfbook2 --paper=letter input.pdf
```

for letter or

```
pdfbook2 --paper=a4paper input.pdf
```

for standard A4. To increase the **inner margin for binding** use

```
pdfbook2 --inner-margin=200 input.pdf
```

to increase the default value of 150. You can submit **multiple files** to the script for processing like

```
pdfbook2 input1.pdf input2.pdf
```

which will result in input1-book.pdf and input2-book.pdf.

OPTIONS

--version

show program's version number and exit

-h, --help

show help message and exit

GENERAL

-p, --paper=STR

Format of the output paper dimensions as latex keyword (e.g. a4paper, letterpaper, legalpaper, ...)

-s, --short-edge

Format the booklet for short-edge double-sided printing

-n, --no-crop

Prevent the cropping to the content area

MARGINS**-o, --outer-margin=INT**

Defines the outer margin in the booklet (default: 40)

-i, --inner-margin=INT

Defines the inner margin between the pages in the booklet (default: 150)

-t, --top-margin=INT

Defines the top margin in the booklet (default: 30)

-b, --bottom-margin=INT

Defines the bottom margin in the booklet (default: 30)

ADVANCED**--signature=INT**

Define the signature for the booklet handed to pdftjam, needs to be multiple of 4 (default: 4)

--signature*=INT

Same as --signature

--resolution=INT

Resolution used by ghostscript in bp (default: 72)
