

Main equations

Here an equation

$$\dot{Q} = k \cdot A \cdot \Delta T \quad (1)$$

or another one

$$\frac{1}{k} = \left[\frac{1}{\alpha_{\text{i}} r_{\text{i}}} + \sum_{j=1}^n \frac{1}{\lambda_j} \ln \frac{r_{\text{a},j}}{r_{\text{i},j}} + \frac{1}{\alpha_{\text{a}} r_{\text{a}}} \right] \cdot r_{\text{reference}} \quad (2)$$

Nomenclature

Latin Letters

A	area
k	overall heat transfer coefficient
L	length
\dot{Q}	heat flux
ΔT	temperature difference
T	temperature

Greek Letters

α	convection heat transfer coefficient
λ	thermal conductivity

Subscripts

a	out
i	in
j	running parameter
n	number of walls
