

Sectioning commands with critical notes

This file provides examples of using sectioning command with `reledmac`. The section titles are in the line numbering, and have critical and side notes.

We use the “`reledxxx`” commands, each of them in their own “`pstart . . . pend`” group.

Page breaks are manually added before chapter with “`beforeeledchapter`”.

Chapter 1

chapter

chapter

I use git to manage some packages. I would like to add a pre-commit hook, to check if I have forgotten For now, I have a minimal pre-commit, which tests only the blank spaces at ends of lines, but not the forgotten..

1.1 section

1.1.1 subsection

subsubsection

subsubsection

I use git to manage some packages. I would like to add a pre-commit hook, to check if I have forgotten For now, I have a minimal pre-commit, which tests only the blank spaces at ends of lines, but not the forgotten.

1.2 section

I use git to manage some packages. I would like to add a pre-commit hook, to check if I have forgotten For now, I have a minimal pre-commit, which tests only the blank spaces at ends of lines, but not the forgotten.
