

Title of presentation

Author

Date and place of presentation

Title of first page

This is an example of a \LaTeX `itemize` list

- first line in an itemized list
- second line in an itemized list
- third line in an itemized list

Title of second page^{*}

The second page with nested, “vertically compressed” lists using the `citemize` and `cenumerate` environments.

- first line in an itemized list
- second line in an itemized list
 1. first line of numbered list
 2. second line of numbered list
- final line in itemized list[†]

For footnotes, the `footmisc` package, providing the options `perpage` and `symbol` is recommended.

^{*} footnotes are often not a good idea for a presentation [†] ... it is therefore useful to write comments into a single footnote paragraph in order to save space

Title of third page

environment name: `cdescription`, comparable to \LaTeX s
`description` environment

used for: vertically compressed lists with small “titles”

A final page with freely arranged text and graphics using the `rsli` environment*

... guess, what is this?

- (A) House
- (B) Pencil

* References to the source of figures or tables may be added as footnotes
