

## Changes by default author

You think water moves fast? **You should see ice.** It moves like it has a mind. Like it knows it killed the world once and got a taste for murder. ~~After the avalanche, it took us a week to climb out.~~<sup>1</sup> Now, I don't know exactly **when** we turned on each other, but I know that seven of us survived the slide... and only five made it out. **Now we took an oath, that I'm breaking now.** ~~We said we'd say it was the snow that killed the other two, but it wasn't.~~ Nature is lethal but it doesn't hold a candle to man. However unreal<sup>2</sup> it may seem, we are connected, you and I. We're on the same curve, just on opposite ends. You don't get **sick**<sup>3</sup>, I do. That's also **clear**.

## Changes by green author

The lysine contingency - it's intended to prevent the spread of the animals is case they ever got off the island. Dr. Wu inserted a gene ~~tahtthat~~<sup>Green</sup> makes a ~~single~~<sup>Green</sup> faulty enzyme in protein metabolism. The animals can't manufacture the amino acid lysine. Unless ~~they're~~<sup>continually</sup><sup>Green</sup> supplied with lysine by us, they'll slip into a coma and die. We're on the same curve, just on opposite ends. However unreal<sup>4</sup> it may seem, we are connected, you and I. You don't get **sick**<sup>5</sup>, I do. That's also **clear**<sup>Green</sup>.

## Changes by orange author with some comments

Now that we know who you are, I know who I am. **I'm not a mistake!**<sup>6</sup> It all makes sense! In a comic, you know how you can tell who the arch-villain's going to be? ~~He's the exact opposite of the hero.~~<sup>7</sup> ~~And most times they're friends, like you and me!~~<sup>OA</sup> I should've known way back when... You know why, David? They called me Mr Glass. However unreal<sup>8</sup> it may seem, we are connected, you and I. We're on the same curve, just on opposite ends. You don't get **sick**<sup>9</sup>, I do. That's also **clear**<sup>OA</sup>.

## No changes

Your bones don't break, mine do. **That's clear.** Your cells react to bacteria and viruses differently than mine. *You don't get sick, I do.* That's also clear. *But for some reason, you and I react the exact same way to water.*

---

<sup>1</sup>[1]: No?

<sup>2</sup>[2]: speaking of unreal...

<sup>3</sup>[3]: Yes, sick.

<sup>4</sup>[Green 1]: speaking of unreal...

<sup>5</sup>[Green 2]: Yes, sick.

<sup>6</sup>[OA 1]: Yeah, I like animals better than people sometimes...

<sup>7</sup>[OA 2]: Especially dogs. Dogs are the best.

<sup>8</sup>[OA 3]: just nice

<sup>9</sup>[OA 4]: Yes, sick.

We swallow it too fast, we choke. *We get some in our lungs, we drown.* However unreal it may seem, we are connected, you and I. We're on the same curve, just on opposite ends. You don't get sick, I do. That's also clear.
