

This document is nothing but a sample file with some data collected by Patil (2021). Package tipauni converts TIPA commands to Unicode characters. This whole document is typeset with the Charis SIL font which is loaded by default by the tipauni package. If you use package tipa instead of tipauni, output will show IPA shapes with T3 encoding. For seeing how this works, please refer to the source file of this PDF. i.e. [tipauni-example.tex](#)

Consonant	Onset	Coda
p	pun.za (claw)	k ^h ap.ra (old man)
b	bɔɖ ^h (bull)	ʃeb.ra (dull)
