

# Stanza with double line numbering

## Summarium

This file provides an example of typesetting verse with reledmac using a double line numbering system.

The new edition adds a starting line of verse not present in the previous one, so we need to make an addition within the margin and text<sup>superscript</sup> the numbering from the older edition. In the centre, we split what was in the first edition one line of verse into two.

To mark the old numbering, we use `\linenumannotation`. For maximum clarity, all line numbers are shown thanks to the settings of `\firstlinenum` and `\linenumincrement` in the preamble.
